

Laser TV with ALR Daylight Screen

LASER TV

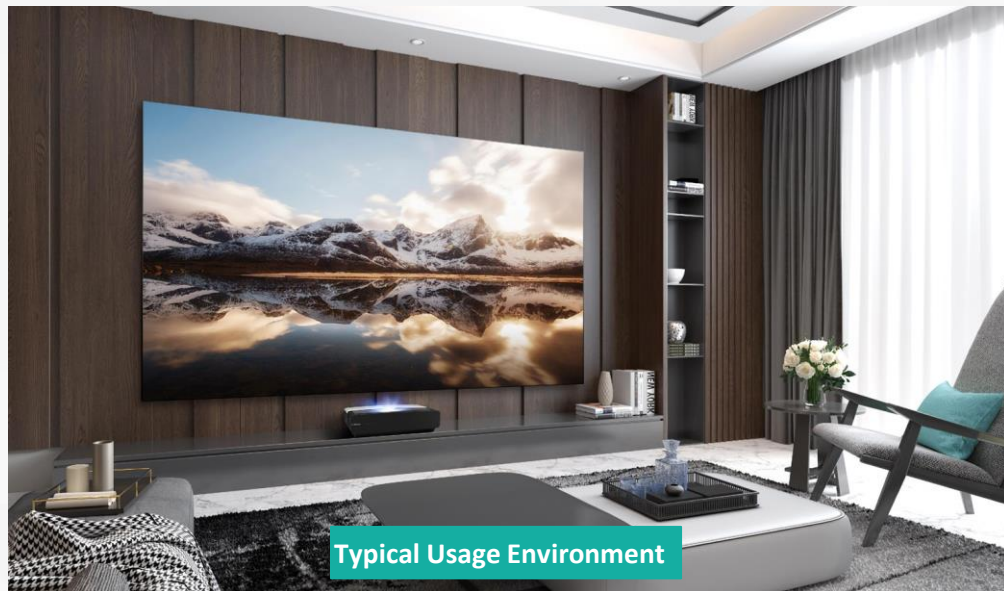

Super Size Your Living Room Entertainment

Laser TV is projection TV system that brings a massive 100" screen to your living room. The ultra-short throw 4K laser projector is perfectly paired with an Ambient Light Rejecting (ALR) Daylight Screen that delivers a beaming, bright picture, even in sunlit rooms. Ideal for airy spaces in your home, the Laser TV achieves rich colors and high brightness in a sturdy and low profile design. And the best part, there's zero assembly required.

Recommended for:

- Daytime viewing / Rooms with lots of natural light
- High ceilings and open spaces
- Users that want to mount the laser console upside-down/above the screen

Laser TV's beaming bright picture can throw off reflections in confined spaces or rooms with low ceilings, so make sure your Laser TV has plenty of room to shine.

Daytime viewing

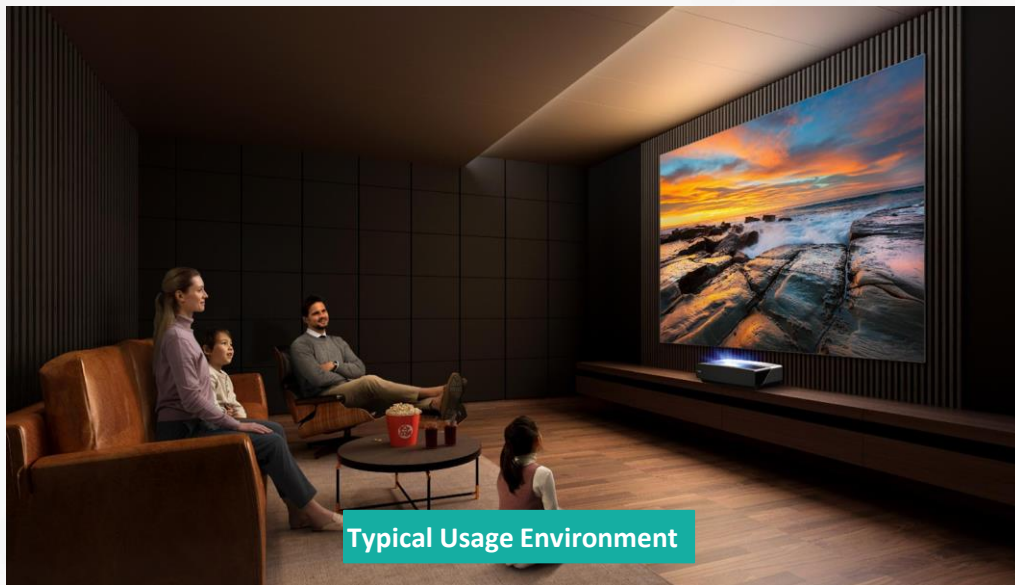

Take Movie Night to the Next Level

Experience the cinematic immersion brought by Laser Cinema's massive 100"/120" Screen. It's enough to make your 20th viewing of Caddyshack feel like something brand new. The 4K ultra short throw laser projector is perfectly paired with an Ambient Light Rejecting (ALR) screen that produces incredible picture clarity over wide viewing angles with brilliant colors. Take movie night to the next level on a screen that's 2.5x/3.5x larger than a 65" flat panel TV.

Recommended for:

- Home Theater / Media Room / Den / Loft
- Smaller spaces with controllable lighting

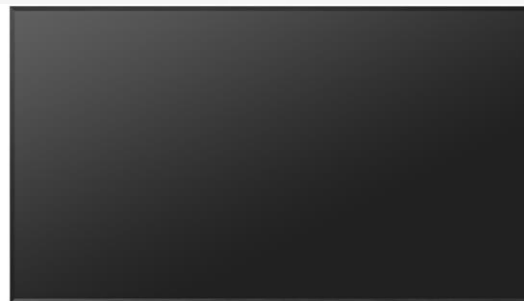

Expect it to take 2 people 1-2 hours to assemble and mount the screen. 3rd party installation also available.
